THE EYES HAVE IT

MEET DOUG, THE BUG MAN

At age seven, Doug won a pair of giant bug-eye goggles at a science fair. That summer, an ant parade marched across the family picnic blanket. Doug put on the goggles and stared at them. The ants left.

He has been staring ever since. Twenty-some years later, the goggles are prescription, the truck is bigger and the bugs still leave.

His eyes aren't actually that big. The goggles are. He hasn't taken them off since 2009. Not even for his wedding. (His wife says it was "a whole thing.")

"Every bug has a moving day. I just tell them when it is."
— Doug, owner
