the true story of

How a turtle started it all

When Sami was a kid, she snapped a photo of her pet turtle, Snappy, mid-grin. She posted it. The internet lost its mind. Millions of likes later, Snappy was famous.

But Sami noticed something: people weren't just loving the turtle. They were loving **the moment**. That tiny, perfect, caught-it-just-in-time moment.

So she grabbed a real camera and never put it down. Today Just Snappy photographs weddings, families, parties, products and pets, with the same patient, happy eye.
